

ACOUSTIC PANELS

STYLISHLY REDUCES SOUNDS & CONVERSATIONS

CASE STUDY > PALLAN & ASSOCIATES, CPA, PANDORA AVE, VICTORIA BC

Working with a local Interior Designer, PALLAN & Associates had the challenge of privacy sounds being heard within offices that shared common walls and hallway spaces. With increased staff in the office, these sounds and conversations were in need to be solved. Monk Office's Commercial Division put together a plan and handled the installation with the specifications of the Interior Designer for acoustic sound silencing panels, that were stylish yet effective for sound reduction.
